

Preparing the App for Submission

Before submitting your app for review, review the “cheat sheet” below to ensure that your app is ready.

[What do I need to do before I submit my app?](#)

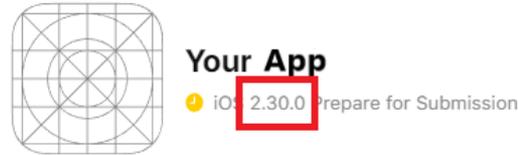

Once you're ready, you can continue with the steps:

1. Go to <https://appstoreconnect.apple.com/login>, type in your login credentials then log in.
2. On your Apple Connect Dashboard, click “My Apps”

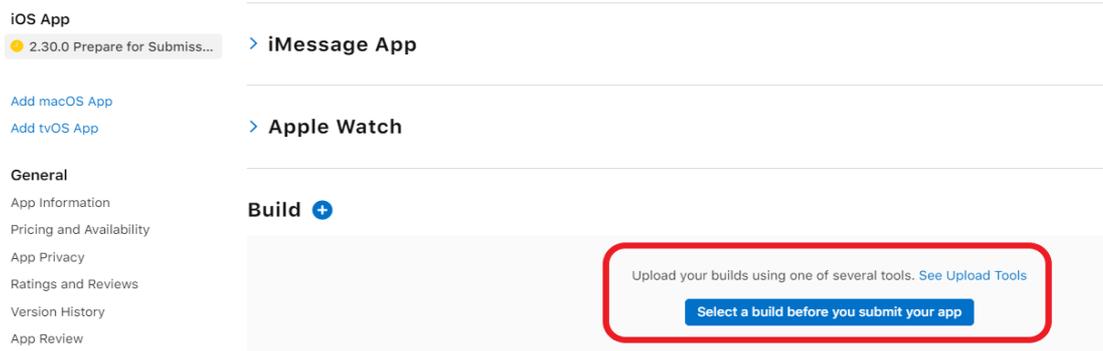

3. Your App Shell should show up along with the app's current version.

Important: If the iOS version still shows up as **1.0**, you still need to wait for 1-2 hours for the app version to show up. Once an app version is available, you can continue with the steps.

4. Click on the app. Scroll down to **Build** and click on **Select a build before you submit your app**

5. Select the most recent build available and click Done.

Add Build

BUILD	VERSION	HAS APP CLIP
<input checked="" type="radio"/>  163852251 3	2.30.0	NO

[Cancel](#) [Done](#)

6. Scroll down to In-app purchases. Select In-app Purchases

In-App Purchases

Select the in-app purchases you want to add to this app version. (Optional)

[Select In-App Purchases](#)

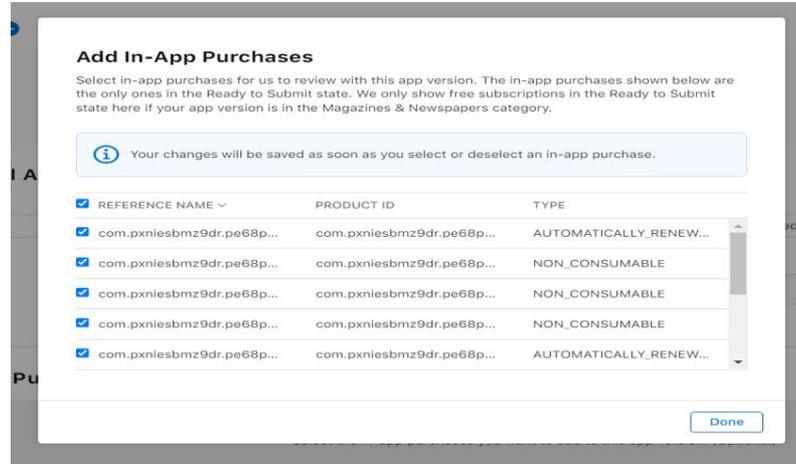

7. Choose the in-app purchases you are going to offer. (**Don't include free plans.** Only the paid plan IDs are needed)

Note: Make sure to cross-check the Pricing Plan ID from the options provided. To check for your pricing plan ID, go to your **Passion.io AppBuilder > Pricing Plans > Click the plan/s you are offering and take note of the plan IDs** (example shown below)

The screenshot displays the 'Create a Pricing Plan' interface in the Passion.io AppBuilder. The browser's address bar shows the URL 'passion.io/en/academy/teach/2.0/pricing/33557', with the ID '33557' highlighted by a red circle. The page header includes the title 'Create a Pricing Plan' and two progress indicators: '1 SELECT YOUR PRODUCTS' and '2 CONFIGURE YOUR PLAN'. The left sidebar contains navigation options: Dashboard, PassionProducts, PassionApps, Theme, PassionMessaging, PassionMetrics, Pricing Plans (circled in red), and Settings. The main content area is titled 'Select at least 1 Product' and features a 'Features' section with the instruction 'Choose the features you'd like to add to this pricing plan. Need help?'. Two feature cards are visible: 'Community' and 'User Tracking', both with a blue checkmark in the top-left corner. Below the features section is a 'Courses' section.

8. Select all IAPs (plan IDs will not be visible right away). Check the correct IDs for your pricing plans then deselect the ones that are not included.

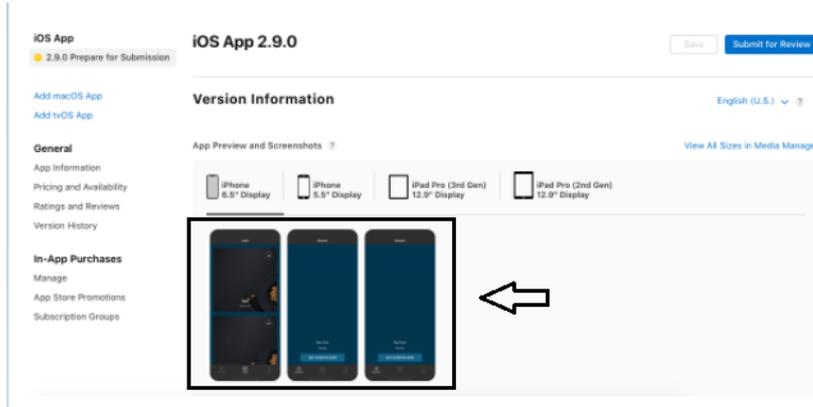

Note: Make sure to not include plan IDs that are not offered as this will cause rejection in your app review.

9. Click **Save** on the upper-right

10. Review your app screenshots and description.

- Screenshots should not show any prices or the word “free”
- App description should be accurate and should not be misleading. Avoid texts/words that would monetize the current global/local crisis, e.g corona, COVID, pandemic, etc. Customers should know what they're getting when they download your app.

How Long Does It Take To Get the App Store Approval?

Depending on Apple's review process/revision requests, your app approval can take up to 5-7 business days. Currently, the app reviews are delayed due to the limited staffing for safety purposes.

Apple will send feedback emails in regard to your app review.
